Nagasu et al. Application No.: Page 3

PATENT

VERSION WITH MARKINGS TO SHOW CHANGES MADE

IN THE CLAIMS:

Claim 3 has been amended as follows:

3. A DNA that specifically hybridizes to the nucleic acid molecule of claim 1 or 2 and that is at least 15 nucleotides long.

Claim 4 has been amended as follows:

4. A method for detecting the nucleic acid molecule of claim 1, wherein said method uses the DNA of claim 3 DNA that hybridizes to SEQ ID NO:1.

Claim 8 has been amended as follows:

8. The method of any one of claims 5 to 7, wherein said T cells are prepared from peripheral blood of said subject.

Claim 9 has been amended as follows:

9. The method of any one of claims 5 to 8, wherein said allergic disease is a cedar pollen allergy.

Claim 18 has been amended as follows:

18. The method of claim 10 or 11, wherein said T cells are prepared from peripheral blood of said pollen allergy model animal.
